

# CSCI 4448: Object Oriented Analysis and Design

## Project Part 1

September 15, 2015

**Team:** Andrew Gordon, Tommy Hoffmann, Connor McGuinness, Daniel Zurawski

**Title:** What To Wear Weather

**Description:** Android application which tells users what kind of clothes they should be wearing based on the weather in their local area.

**Platform:** Andoid (maybe iOS).

**Languages:**

Language	Andrew Gordon	Tommy Hoffman	Connor McGuinness	Daniel Zurawski
Java/Android	Intermediate	Intermediate	Beginner/Be./Intermediate (iOS)	Beginner/Intermediate

**Functionality:**

- Retrieves weather forecast from current location via GPS or saved location
- Makes clothing suggestions based on user chosen gender and weather forecast
- Swiping left and right changes forecast day

**Stretch Functionality:**

- Include fashionable suggestions from retailers
- Save retailer suggestions for later viewing and purchasing
