CSCI 4448: Object Oriented Analysis and Design Project Part 1

September 15, 2015

Team: Andrew Gordon, Tommy Hoffmann, Connor McGuinness, Daniel Zurawski

Title: What To Wear Weather

Description: Android application which tells users what kind of clothes they should be wearing based on the weather in their local area.

Platform: Andoid (maybe iOS).

Languages:

Language	Andrew Gordon	Tommy Hoffman	Connor McGuinness	Daniel Zurawski
Java/Android	Intermediate	Intermediate		Beginner/Intermediate

Functionality:
- Retrieves weather forecast from current location via GPS or saved location
- Makes clothing suggestions based on user chosen gender and weather forecast
- Swiping left and right changes forecast day

Stretch Functionality:
- Include fashionable suggestions from retailers
- Save retailer suggestions for later viewing and purchasing
